STENCIL PRINTER **MS20**

**MECHATRONIKA**

# MS20

## Description

Mechatronika MS20 stencil printer enables manual application of solder paste to PCB via screen or metal stencil. Rigid mechanical construction ensures a constantly high printing quality even for the fine pitch technology. Four axis independent movements of printing table gives quick and precision set-up. Ease of operation makes it useful for small and middle lot production.

## Product Features

- Rigid mechanical construction with non backlash guidelines
- Independent adjustment in four axes
- Micrometer adjusting screws
- Good price to performance ratio

## Technical Specification

### PCB
Window in the stencil frame: 295 x 325 mm

### Adjustment range
X,Y axis: +/-12,5 mm
Z axis: +/- 3 mm

### Table rotation
+/- 30 deg

### Adjusting pitch
X, Y, Z – axis: 0,01 mm

### Dimensions and weight
580 x 440 x 410 mm, 20 kg
